ansehenSeitentransparenzFacebook liefert Informationen, mit denen du die Intention von Seten beser verstehst. Ier erfuurst du mere zu den Personin, die die Seiten verwalten and Beinriage Darin Posten. Alle ansehen More Launch on Windows, Mac and Linux. We need the latest version of Java. Jailbreak (iOS) or Root (Android) is unnecessary as this software is run by a computer. When the game TsumTsum is updated, our server is updated for a maximum of 24 hours, there is no need to download a new version of the software. How to use: Download below. Unzip TsumTsumCASH.zip. Launch TsumTsumCASH.jar. It is important that you can purchase the subscription below to access additional features. Buying access several times is cumulative and will make your subscription longer-lasting accordingly. It may take no more than 24 hours for a member to access. Each membership is valid for only one LINE account. DO NOT delete your LINE account. Membership cannot be transferred to a new account (even if it has the same email details and identical account details). Membership is not on transfer. Make sure you have membership in the correct LINE account and the right server (US or JP). When you purchase membership, you agree to the above terms. If you have a Brazilian PayPal account, please use this link because the higher purchase will not work. toutTransparence de la PageFacebook vous montre des informations pour vous aider et mieux comprendre le but de cette page. Decowr les action de persona qui g'rent et publient du contenu. Voir tout I know there are players out there that coin hack. Don't judge, just curious what your ambitions or drive for the game. I really ask in terms of misunderstanding. For example, my wife likes to collect certain books. But she refuses to buy them online, she likes hunting. For me, Tsums is similar. Having to play and earn coins, get limited to add to keep the full collection alive my excuse to play. If I had unlimited coins in my mind, I really only played for a high score, and didn't really want to do anything. Again, I'm curious. I know my point of view. I'm just trying to figure the other side. Anyway, I'm glad we're getting in touch for something. :D Page 2 28 comments Click here to download a toolkit: You can run it on Windows, Linux or Mac OS X. This program also needs java 7 installed. Click here to download Java For any issues, problems and queries, you can send a message: Step-by-step guide: Install Java 7. Double click on the tsumtsumtoolkit.jar file to run it. Can't run it? Sign up to your LINE account on the next screen: Login problems To try out the toolkit, click Play... Click 30,000-50,000 coins, and wait until the timer is done. Don't open your game until the timer is completely gone. If you have Java 7 correctly installed, you should be able to double-click tsumtsumtoolkit.jar tsumtsumtoolkit.jar This is. Please choose what problems you face: tsumtsumtoolkit.jar opens in Winzip/WinRAR, shows 2 folders: com and META-INF Error: Basic Class Found Error on OSX: Unidentified Developer None of the above Please Please select what mistake you encountered: I don't know my email LINE/password I log in via Facebook error message: Tsum app is not authorized Error Message: LINE Login Failed None of the above If you logged in via Facebook, the LINE email box may be you can set up line email (and change password) in the LINE app: You can also change the password to line. If you can't log into your Tsum Tsum account via LINE, you can play as a guest. You can check this by changing the profile name you see or displaying the image in the LINE app. This should change your name and picture in the game. If you've just been called a player, you play as a guest. You can link your game account to your LINE account by clicking the invitation button: If your game doesn't have an invitation button, it means you entered the age below 13 years after you set up the game, and as such, you're blocked from using your LINE account. In this case, you will have to reinstall the game and choose the permitted age (preferably over 18 years). Take note if you play as a guest and you reinstall the game, you will lose all the course of the game. This can mean two things: your LINE email or password is incorrect. Please check your LINE email in the LINE app. In addition, changing the LINE password also sometimes fixes this problem. Click here for more information you have tried to log in with the wrong email/password about 3 or more times. This will result in all further login attempts being blocked within 24-48 hours. Please try again later. If you have Java 7 properly installed, you should be able to double-click tsumtsumtoolkit.jar to run it. If it instead opens in Winzipa, WinRAR, or some other lightning software, you need to fix it so that .jar files run into Java. Jarfix can do this automatically for you. Click here to download you will need to install Java version 7 or 8. Click here to download the latest Java If you encounter an error message like this: Follow these steps: Control-click or right click tsumtsumtoolkit.jar Select Open from here: Now you get the opportunity to continue running the program.
